*Making Automation Work for You and Your Shop
Select the Highest ROI & Least Risk Projects*

**Light breakfast & coffee
with Colin Wilson**

WMEP Senior Consultant, Automation
Thursday, October 21
7:30 – 10:00 am

The Granville Business Improvement District
7817 W. Brown Deer Rd
Milwaukee, WI 53223

WISCONSIN MANUFACTURING
EXTENSION PARTNERSHIP

How can automation work in my low-volume, high-mix environment?

Colin Wilson will unwrap several areas where automation and technology can help any shop, regardless of size. He'll teach you **how to use WEMP's assessment process to identify the best automation projects**, those with the lowest risk and most reward (ROI) for your business.

Colin's decade-plus of automation experience includes a wide range of applications in medical & life sciences, contract manufacturing, appliances, industrial, automotive & transportation, and consumer products. He's worked with small manufacturers starting down the automation path and multinational corporations who want to optimize their value stream.

Join us at 7:30 Thursday morning, October 21, for a light breakfast, good coffee, and an optimistic session exploring how to **discover how automation can work for you and your shop**.
